_____

Hi,

When I try patches instlar gives me error in file configuration.php, but I see that in reviewing all the options I get this jms2win configuration in mysql version

Parse error: syntax error, unexpected '

_____

Do you try to install the patches from a slave site ?
Which version of JMS are you using ? JMS 1.2.x, JMS 1.1.x ? Exact version number.

Do you have a special text in your configuration.php file (the one of you website that try to perform the patch) ?

_____

Thanks for your reply.
There is a copy from a master site where the jms2win not installed when I install the Multisites gives the error, and configuracion.php file has no special text.

Version: JMS 1.2

_____

Edit and check the content of your configuration.php file.
Clearly, there is a conflict with the content of this files that product a PHP syntax error.

The error message is clear.
It has a problem with a "
