

```
window.addEvent('domready', function(){ var JTooltips = new Tips($$('.hasTip'), {
maxTitleChars: 50, fixed: false}); }); window.addEvent('domready', function(){
$$('dl.tabs').each(function(tabs){ new JTabs(tabs, {}); }); }); function changeimgcolor(
filename){ var elt = $('colorimg'); var img = elt.getElementsByTagName( 'img' )[0]; var
parts = img.src.split( '/'); parts[ parts.length-1] = filename; var src = parts.join( '/'); img.src
= src; }
```

Patches for mighty version 1.0

: Multisites Patches Definitions for Mighty V1.0.0

Price: 29.99 EUR

Patches for mighty version 1.0

Plugin that contain the JMS Multisites patches definition for the Mighty extension.

Only the mighty extensions where were able able to install with a trial version are defined.

The extensions are defined for the installation and not for the sharing as the components are encrypted with IonCube and that we were not able to review the codes.

The following components are defined:

- .Mighty Analytics
- .Mighty Assitant
- .Mighty Commerce
- .Mighty Defender
- .Mighty File Manager
- .Mighty Invoice v.2
- .Mighty Membership
- .Mighty Message
- .Mighty MassMail
- .Mighty Permissions
- .Mighty registration
- .Mighty Resources
- .Mighty Touch.

Most of the free public modules and plugins are also defined.
Require JMS Multisites version 1.2.30 or higher.

Remark:

Some Mighty extensions may have conflicts with JomSocial.
They are using the same extension name and the same MySQL table names.
