

Fix the maintenance menu under Joomla 1.5

- Remove some PHP notice present in the maintenance
- Fix some JSON encoding in the maintenance menu that may appear with PHP 5.2.

Ensure that the result to encode with JSON does not contain any reference to resource or object that can not be encoded.

Replace all the object or resource by string.

- Bundled with Patches definition 1.3.01

Fix the patch that install the missing CMS library required by the maintenance menu under Joomla 1.5
