

Jms multisites for joomla 1.3.43 is bundled with Patches definition 1.3.39

- Fix the packaging of the patches files applicable for Joomla 3.4

2 old patches were distributed in the JMS 1.3.42 that cause an alert in the "Check Patches" under J3.4.0

This affect new Joomla 3.4 installation and not the upgrade from J3.3.x to J3.4.0

The patch present in J3.3.x were good and therefore didn't required any installation under J3.4.0 except from a fresh Joomla 3.4.0 installation.
