Version 1.2.11 : Add 23 extension definitions

The new jms multisite for joomla version contain plenty new extensions defnitions for the jms tools and also add fixes for virtuemart 1.1.4 and ACE SEF.

We also add the possibility in JMS Tools to install "core" module because some extension like Roket Themes install their modules and plugins as core joomla instead of "normal" modules and plugins.

This version is bundle with Patch Definition 1.2.14 that includes

- A patch for ACE SEF to allow specific configuration for each websites
- Modify the VirtueMart patches to be compatible with VM 1.1.4.
    It is strongly recommended to update JMS before installing the VM 1.1.4 because the previous JMS patches is not able to install patches on VM 1.1.4 and may result by an install of everything.
- Add JMS Tools (install) definitions for :
    AceSEF, AEC modules and plugins, ALFContact, AvReloaded, Core Design Login module, Chrono Comments, iJoomla Ad Agency, ImageSlideShow, Jobline, JoomlaFCK editor, RokCandy, RokDownloads, RokNavMenu, RokNewsPager, RokQuickCart, RokSlideshow, RokStories, RokTabs, RokTwittie, Simple Mp3 Bar, All Weblinks, Library Management, Gavick PhotoSlide GK2
