

This Jms Multi Sites version is partial compatibility with Joomla 1.6 beta 14.

It also force the alias field in lowercase.

A new keyword {user_email} is added.

Bundled with jms multi site patch definition 1.2.49

Add a patch for the All Video download script to compute the "document root" directory based on the deployed directory. The sitePath "document root" directory is not correct when using Symbolic Link.

Add JMS Tools (install) definitions for :

- JoomlaWorks All Video,
- Ninja Content 1.5 (Ninja 1.5, Nooku Framework, Koowa system plugin)
