Jms Multisite for joomla 2.5

This version add several joomla 2.5 compatibilities features

   -   Add a basic ACL control options for joomla 1.7 and 2.5 to allow restrict the access of Jms multisite to some specific joomla user group.
      Now the "option" button is available to setup the ACL that give the access to Jms multisite for joomla 2.5.
   -   Fix the joomla 2.5 layout dynamic parameters that is used by some specific layout.
      This allow rendering correctly the "sub-parameters" defined in the layout.
      Now the "List anonymous" layout can be installed under Joomla 2.5 and its sub parameters are available.
   -   Fix the replication of website when they contain shared tables with complex sharing and filtering.

Bundled with Patches definition 1.2.82

   -   Add patches for community builder under joomla 2.5.
      Now use the same patches as the one defined for joomla 1.5.
      This allow using specific CB configuration for each website.
   -   Add JMS Tools (install) definitions for :
    - ARI Image Slider
    - ARI Smart Content
    - EZ Realty
    - J2XML Importer
    - JomEstate
    - JoomSlide
    - Power Admin
    - sigplus
   -   Add Joomla 1.5 sharing definition for:
    - EZ Realty
   -   Add Joomla 2.5 sharing definition for:
    - EZ Realty
