# Joomla Multiple Sites and user sharing

*Edwin2Win - sprlu*

## Articles sharing Version 1.0 for Joomla Multi Sites

EUR24.99

Display the existing articles, categories, sections from any websites defined in Joomla Multi Sites.

With this extension you don't need anymore to replicate or use special extension to synchronise your articles, categories and sections.

This "Joomla Multi Sites Articles sharing" component work like the standard joomla menu articles. With this extension you can select any article, categories or section from any webistes managed by Joomla Multi Sites. You just have to select the website from which you want to display the information.

â€œJMS Articles Sharingâ€• only display the articles.

The menu type implemented are:

- Â Â Â Multi Sites articles layout;
- Â Â Â Multi Sites Category Blog Layout;
- Â Â Â Multi Sites Category List Layout;
- Â Â Â Multi Sites Front Page Blog Layout;
- Â Â Â Multi Sites Section Blog Layout;
- Â Â Â Multi Sites Sections Layout;

This extension does NOT allow to edit articles, categories, or sections form the front-end.

When you want to edit the articles, ... you have to go in the website where it was created and use the starndard Joomla tool to edit them.

The â€œArchives list layoutâ€• is not implemented.

â€œJMS Articles Sharingâ€• is in fact an extension that convert the standard Joomla â€œarticlesâ€• PHP source code â€œcom\_contentâ€• component into a â€œJoomla Multi Sitesâ€• compliant code.

When an original source code is converted by â€œJMS Articles Sharingâ€• it saves it into a cache to improve the performance. The cache is automatically rebuilt when you update your Joomla version and the conversion of the sources is re-executed. By this way, this let you benefit of the Joomla bug fix and re-apply them into the Multi Sites version.

This extension require Joomla Multi Sites version 1.1.5 or higher.

One of our customer has contributed to this product and has provided us a catalan language files of the Articles Sharing is also available and can be downloaded [here](#) or go in our free download section.
