Jms Multisite for joomla version 1.3.19 (all editions)

- Add display of the "Parent Site ID" in the list and also compute the "Owner Name" based on the parent Site ID when the websites are created from a slave site.
- Add call to multisite "onUpdateAdminUser" plugin to allow the "Partial User Sharing" create the Site ID / User ID relationship on a slave site that share partially the users.
  This avoid problem when creating a slave site from a slave site that has the users partially shared.
- Fix the display & save of the owner ID when editing a slave site.
