Jms multisite for Joomla - All editions

- Add sharing definition for Joomla 3.3
- Add javascript "Joomla.submitbutton" call in the "check patches" to perform the "uninstall" verification and add display of an alert box to confirm the uninstallation of the patches.
- Fix some PHP 5.4 Strict, warning and notice messages
- Fix some J1.5/2.5/3.x API compatibilities (J2WinDB)

Compatibility with Legacy (1.5/2.5) extension for Joomla (2.5/3.x) - see : http://www.ajmool2win.com

aJmooL 1.5 is a fork of Joomla 1.5 that provides security fix and PHP 5.4 compatiblity for Joomla 1.5 and is designed to allow the Legacy 1.5 extension working with old Joomla 1.5 but also with new Joomla 2.5/3.3 login encryption

- Add aJmooL 1.5 compatibility
- Jms2WinFile::exists() static function detection
- Jms2WinFolder::exists() static function detection

- Add Legacy 1.5/2.5 for joomla compatibility
- Open some internal JMS API to make them available for the Legacy 1.5 extension for joomla

Jms multisite for joomla - Full edition

- Add javascript "Joomla.submitbutton" to call the "local" submitbutton and perform field verification.

Bundled with Patches definition 1.3.30

- Fix Geo-Localisation for the ICC when only the Country DB is present (City disabled).
  In this case, a message "Country Failed" is returned due to ICC that is uppercase instead of lowercase.

- Add patch in "filesystem/path.php" under Joomla 2.5 to fix ajax issue with JomSocial (JPath::check Snooping....)
- Update Wordpress patch for WP 3.8 and its new "wp-load.php" initialisation - Fix WP for Joomla 2.5+ compatibility
- Add JMS Tools (install) definitions for :
  - Captcha - Play Thru
  - Dynamic 404
  - Fix JoomSEF
  - OS Property
- Add Joomla 1.5 & aJmooL1.5 sharing definition for:
