In this version we have review all the icons and graphical elements to provide more "sexy" screen.

We also have included the definition of some new extension for their installation from JMS Tools and also some sharing extensions.

Here it is the details of the changes:

- Add display of the latest version number in the about and in the "check patches".
  The objective is to provide to the user a quick view of the latest version available.
- Revamp all the icons and graphical elements for the JMS Template (Sharing panel) and JMS Tools
- Bundled with Joomla 1.5.14 original files in case of rescue restore.
- Bundled with Patch Definition 1.2.4 that add the definition of several extension for the JMS Tools and sharing.

  Add (install) definitions for :

  - AlphaUserPoints, civiCRM, Content Templater, FrontpagePlus, JContentPlus, Mosets Tree, noixACL, ReReplacer

  Add sharing definition for:

  - AlphaUserPoints, Custom Properties, JContentPlus, K2, Kunena Forum, MisterEstate, Mosets Tree, Noix ACL

When a previous JMS (Release Candidate) require to update to this stable version, you can get the latest version from this website in the menu http://www.jms2win.com/get-latest-version

You can install the JMS stable version over the current one.
It is not necessary to un-install JMS to install the stable version over a Release Candidate.
