

Joomla 1.7 compatibility

The new Jms Multi Sites version 1.2.55 introduce the compatibility with Joomla 1.7 alpha 1.

We also enhanced the processing of the site ID so that joomla 1.6 and 1.7 are fully compatible with joomla 1.5.

We also fix "notice message" that may appear when editing an existing template written by an Jms multisites version 1.1.x.

Bundled with Patch definition 1.2.59
