This Jms Multisites version add comptibility with Joomla 1.7:

- Fix an error message when working with Joomla 1.7 and that verify that the DB patches are correctly installed.
- Bundled with Joomla 1.7.0 stable installation files.
- Add patch for Joomla 1.7.0 stable version concerning the creation of slave sites.

The patch consists in redirection of the "completed" screen to the front-end of the slave sites instead of displaying the front-end into the installer frame-work that is not able to display correctly additional CSS.
