Jms multisite for joomla 1.2.92 remove a "PHP notice" message for Joomla 2.5 compatibility. It is also bundled with the jms multisite patches definition 1.2.86 that:

- Add a patch for JomSocial, jomdirectory, jomestate
    This fix a problem with the Ajax call performed by theses extension that may get error due a wrong value present in JPATH_COMPONENT.
    This replace the dirname(__FILE) by JPATH_BASE.'/components/**OPTION'** where the option is the extension directory.

- Add JMS Tools (install) definitions for :
   - JFBChat (Joomla Facebook Chat)
   - Podcast Manager
- Add Joomla 2.5 sharing definition for:
   - JomRes
