# Bundled with JMS Multisites Patch definition version 1.2.39

## Add/modify patches

- Fix the patch for Community Builder 1.2.3 that moved some code into another source.
  If you try install the previous patch on CB 1.2.3, this result by the uninstall of all the patches.
  So it is required to use the JMS Multisites patch definition 1.2.39 or higher with CB 1.2.3.

- Fix the patch for the Sermon Speaker 3.4.1.
  In fact with version 3.4.1, the patch is no more required. Now they save the configuration into the DB.

- Add patch for CssJsCompress.

## Add JMS Tools (install) definitions for :

- CssJsCompress,
- Annonces,
- Djf Acl,
- EstateAgent,
- jSecure Authentication,
- MooFAQ
- QuickContent,
- PU Arcade,
- AjaxChat,
- Add also some plugin for JomSocial 1.8.3

## Add sharing definition for:

Following sharing are considered as "candidate for sharing". They need more feedback and validation from the customer who request them.

- Annonces,
- JVideo,
- PU Arcade,
- AjaxChat
- JEvent with default excluded.
