Bundled with Patch definition 1.2.54

- Add patches for Joomlart T3 framework V2.
  T3 framework 2009 does not need patches and is perfectly OK.
- Add a partial patches for Rockethemes Gantry Framework 3.1.4.
  Remark: The patch is partial.
  Only the "save" button in the update of a template parameter save as Rockethemes does not "hacked" the code.
  Concerning the "Apply" button, Rocketthemes continue to update the "master" parameters file and not the slave one.
  The patch is not possible as present in an "encrypted/packed" file.
- Fix a bug present in Joomla 1.5.16 and higher that create duplicated session and forbid the Single Sign-In.
  As Joomla didn't yet solved the problem of session after they changed their algorithm to try improvin the login security, this patch consists in applying the roolback to the Joomla 1.5.15 implementation in aim to allow the Single Sign-In when working on the same domain.
- Add JMS Tools (install) definitions for :
  - iJoomla Sidebars,
  - Ambra subscription,
  - Amigo,
  - Juga plugin and modules,
  - DJ-Catalog2,
  - Sexy Bookmarks,
  - sh404sef modules and plugins.
- Add Joomla 1.6 sharing definition for:
  - CB 1.4
