hi there

i have a question to ask about multisite and virtuemart.

the scenario is:

- 1.im already create a site with multisite and virtuemart.
- 2.im already create a default site and assign a template and install virtuemart in there.
- 3.all running perfectly.
- 4.then, i already create a slave site.this slave site running perfectly also in my slave site administrator already have virtuemart.
- 5.but, the problem is, when i click at virtuemart menu from slave front end site, this notification revealed: "An error has occurred.

The requested page cannot be found.

If difficulties persist, please contact the System Administrator of this site and report the error below. #404 Category not found"

## Re: multisite can working with virtuemart or not??? Posted by edwin2win - 2012/09/22 10:25

YES JMS can work with VirtueMart.

This www.jms2win.com is a slave site that use VirtueMart for the order processing.

If you have an error 404, this is a symptom of a SEF error.

Perhaps a problem in the .htaccess configuration.

If you want that we have a look on your environment to help you identifying the origin of the 404, this is still possible with our billable support that you can order at
