Problem for sharing Adsmanager.

Posted by rezamoghtada - 2011/11/14 15:50

Dear Edwin,
I am sharing Adsmanager, every thing is OK but i can not see the Ads in Slave sites in all Adsmanager modules.

Could you help me please??

Regards
Reza

Dear Edwin,
At the screen shot no:1
you can see Ads share (in joomla 1.5 shows share singe and joomla 1,7 shows specifics tables.
But it is dose not matter, in both joomla 1.5 and 1.7 result are same.
Picture no:2 you can see module and picture no:3 plgin

Also please see the screen shot of Adsmanager in master in picture 4 and also in picture 5 in slave site and as you see you can not see the Ads.

I test it in joomla 1.5 and 1.7 and in both version all result are same.
Regards
Reza
