Search engine shared multisite article virtuemart?

Posted by crony - 2009/01/16 18:17

Hello,

I would like to have informations about possibilities to use the joomla/ virtuemart search engine thru multisite/article sharing.

I would like to use the search engine of a master site to all content of slave sites, selecting multiple sites as well...

Is this feature available ?

Regards

No this is not available.
Such requirement suppose a specific seach module that could be able to search between all the websites and merge the results.

Hello,

Thanks for answering ! (btw the "subscribe to post" from the forum seems not functionning :( )

Some advanced features have been added on the search plugin, see here:
http://forum.joomla.fr/showthread.php?t=84518

Might be helpful to start planing doing a proper plugin for MultiSite plugin ? B)

Thanks !
