Slave site statistics

Posted by msauvola - 2009/07/21 22:00

Anyone know of a way to generate visitor statistics on individual slave sites?

I have tried bbclone, but it gives me a total of all sites statistics together, not individual sites.

Anyone have an idea how to accomplish this?

Mike

Personnally, I use Google Analytics to have some statistic on my websites.

You can download the Multi Sites Google Analytics module for free at
http://www.jms2win.com/free-download/doc_download/4-multi-sites-google-analytics

Thank you. I'll give it a try.
