JMS Article Sharing Issue

Posted by sunilwwc - 2012/05/14 12:41

We purchased just now Article Sharing and installed completly but its not working for these domains already attached www.abhinavsharma.co.in and www.blyassociates.com when we enter article in WWC2 (Main Website) its not sharing to other sites and even we not able to update content from one single CMS

To use the article sharing, you need to create menu item that select the site from which you want to read the articles.

The URL that you provided does not show how you have defined your menu item and if you used the "Multisites Article Sharing" and if you selected a site and provided the parameter.

So provide the detailled settings that you used and describe the scenario that you used to be able reproduce the issue.
