

First Latinoamerican University

Posted by illanosb - 2015/09/29 20:52

We were the first university on Latinoamerica on use a central CMS, we were the first one on use multisite structure too. For that we use Joomla JMS from the first version many years ago and always have a good communication with Edwin Cheront.

This is a great job, we implemented a strong CMS and we have more easy updates and administration. We still need help on some things but we are very satisfied with JMS and with support.

Very good product!
