_____

I have used JMS Version 2.1.5 and its really very useful extension. Also the support the technical guys provide is very nice. I had so many problems while configuring this extension, Edwin helped me through all the problems.

Also I had requested him to integrate SWMeno Pro and chronoform in the latest version and Edwin did this within one week. Very quick response time.

Both the extension and the support you guys provide are best!!!!!

Thanks a lot for all the support.

Regards,
JoomlaVogue Team
