# Restore Language Files

Posted by eclipsemedia - 2013/12/04 17:42

---

My developer who had worked on a site had deleted language files for JMS 1.2.97

after unzipping the com_multisites_V1.2.97 file
I tried uploading com_multisites_V1.2.97adminlanguageen-GB files to

/public_html/administrator/language/en-GB

I still see missing language settings. As you can see below

http://my.jetscreenshot.com/19880/m_20131204-ebwj-102kb.jpg

Please help. :)

You can simply re-install the JMS 1.2.97 over the current one.
This will install the missing language file.

PS: I remember that JMS 1.2.97 can not be installed on J2.5.10 or higher.
So if you are still in J1.5.x of

==========
