

## Restore Language Files

Posted by eclipsemedia - 2013/12/04 17:42

---

My developer who had worked on a site had deleted language files for JMS 1.2.97

after unzipping the com\_multisites\_V1.2.97 file

I tried uploading com\_multisites\_V1.2.97adminlanguageen-GB files to

/public\_html/administrator/language/en-GB

I still see missing language settings. As you can see below

[http://my.jetscreenshot.com/19880/m\\_20131204-ebwj-102kb.jpg](http://my.jetscreenshot.com/19880/m_20131204-ebwj-102kb.jpg)

Please help. :)

You can simply re-install the JMS 1.2.97 over the current one.

This will install the missing language file.

PS: I remember that JMS 1.2.97 can not be installed on J2.5.10 or higher.

So if you are still in J1.5.x of
