JMS, multisite for joomla - Joomla Multiple Sites and user sharing Generated: 30 August, 2025, 22:38

Restore Language Files Posted by eclipsemedia - 2013/12/04 17:42
My developer who had worked on a site had deleted language files for JMS 1.2.97
after unzipping the com_multisites_V1.2.97 file I tried uploading com_multisites_V1.2.97adminlanguageen-GB files to
/public_html/administrator/language/en-GB
I still see missing language settings. As you can see below
http://my.jetscreenshot.com/19880/m_20131204-ebwj-102kb.jpg
Please help. :)
Re: Restore Language Files Posted by edwin2win - 2013/12/07 11:34

You can simply re-install the JMS 1.2.97 over the current one. This will install the missing language file.

PS: I remember that JMS 1.2.97 can not be installed on J2.5.10 or higher. So if you are still in J1.5.x of
