Article management

Posted by ratul - 2009/07/21 11:07

I have installed multi site component in joomla. And I have created two domain and one master domain. No I need to create one article and that can shared by two sub domain. If the article is changed then both the domain get effect. Using multisite component that can be managed or not?

Please help this is very urgent.

Thanks in advance.

You have to use the extension "Article Sharing for JMS".
See product detail
http://www.jms2win.com/download?page=shop.product_details&flypage=flypage.tpl&product_id=34&category_id=1
