Before Buy Questions

Posted by R1n4 - 2009/10/18 16:02

Hello,

at first sorry for my bad english, iam a german User.

My Questions:

Is the Multisite generating automaticly "Joomly Childs" for user who register at the Main Page.

f.e I visit xyz.com and click register my own jooma , than i register and my joomla is ready to use and i can manage it?

Or is it only for own use, so i can create more copys for joomla and its only for my use?

I want give Users the chance to host them! Without Installation SKILLS!

LG
Sabrina

Sabrina,

the creation of websitefrom the front-end (Joomly Childs) does not follow exactly the processing that you described.

In JMS, to create a website from the front-end, the user must first be registered and after, you can define a menu entry where the user will enter some parameters to create the slave site.
See the tutorial video 13 that present how to create such service.
http://www.jms2win.com/tutorial#jms12x-13

So YES you can provide to your users the creation of their own website and hide the installation as you will have setup everything to create such website.
