

## User Sharing : Sharing folder do not appear

Posted by ludo54 - 2010/01/20 18:23

---

Hi,

I just bought jms and discover its facility. its's great

I success to create slave and go to step to trying sharing user between master and slave 1

I see the tutorial n°16 and make exactly the same but when i create the template and select slave 1, the folder Sharing do not appear. what is wrong ?

i use joomla 1.5.15 french version  
safe mode, register global, ...

If you speak french, I also speak french.

When you say folder sharing, which folder ?

If this is the "templates" directory, perhaps you have to check the JMS template "files and folders" tabs where you should have the "special copy" for the "templates" directory.

Can you confirm that you are working on Unix and that Symbolic Links is allowed.

I could not sharing rules in the sharing panel because it isn't appear.

j'ai suivi le tuto n°16.

j'en suis à la 2ème étape. Le site slave 1 est créé.

L'onglet n'apparait pas. J'ai suivi scrupuleusement le tuto. Je ne vois pas où cela ne marche pas ? Je suis sous Unix et Symbolic Links est permis.

Est ce que cela peut avoir un lien avec le safe mode, register global ?

La question à ce poser est : Utilisez vous MySQL 5.0 ?

Avez-vous selectionné un site avec une DB qui est à répliquer (s'il n'y a pas de BD à répliquer alors il n'y a rien à partager).

Essyez aussi de sauvez le modèle et puis le ré-ouvrir pour voir si l'onglet ré-apparait.
