how can i install perticular module in slave site

Posted by visualsparks - 2010/04/01 07:54

_____

i want to install any module in slave site but it shows a messege

* This extension is not found in the master site.
* Please install it first in the master site before installing it into the slave site
* Install Module Error

i also install perticular component in master site. and then i install in slave site it again shows the same above message.

_____

Send this extension in attachement of an email (see contat us).
We will review this extension and potentially add its definition in the JMS tools to have an alternate solution to install it.
