Virtuemart module on all slave sites?

Posted by bdovpro - 2010/04/08 22:10

When I click new module I see all the virtumart modules even though i never installed them on my fresh slave site, is that suppose to happen or is there a database conflict or something?

I think (but do not remember) that this is normal.
I don't have the possibility to recheck it now.
We are in Joomla Dat Mallorca and will not be available until the 13th april.
