virtuemart

Posted by amir460 - 2010/07/06 08:34

---

hello my dear friends

I use this component and synched to my sites.

Now i want to synch virtue to these sites,please guide me

I have to buy plugin or another module for this work.

Thanks

The concept of JMS Multsites is to share the joomla installation and also have the facility to share a limited number of extension.
http://www.jms2win.com/component/content/article/135

If is possible to share the VirtueMart extension.

Sharing mean that the data is present only once.
This does not need synchronisation.

You don't need our Plugin for VirtueMart that is used when you want to sale the website creation from the front-end. In this case, this plugin provide a solution with VirtueMart
