JMS, multisite for joomla - Joomla Multiple Sites and user sharing Generated: 5 September, 2025, 15:40

Share an article with all sub-sites Posted by axier - 2010/07/08 10:54
Hi,
I'm using "JMS Articles Sharing" component, and I'm able to share one article with one site. That's ok.
But, I was wondering if is posible to share an article with ALL my subsites in one step. I've a lot of subsites, and now is tedious to share one-by-one all the articles.
Is there any method to do this?
Thanks in advance,
Axier

Oh, I realize by myself.
I can share an section instead an article, and all the new articles in that section will appear in all my subsites.
Sorry for my ignorance. ;-)
