User Sharing

Posted by francoisp - 2010/08/03 14:21

Hi there

I have installed JMS and my slave sites are fine. Users accounts are shared. One question - if a user login at Say Site B and go to SIte C - how can I make sure that the users dont have to re-login at the next site? I mean the user is authenticated on site A but when the users visit site B C or whatver he has to login again?

Any help will be appreciated!

Thanks!
