The patch definition 1.2.35 (or higher) also requi

Posted by Bendo - 2010/08/19 05:43

Hi Edwin,

I purchased JMS 1.2 a while ago and am rebuilding my sites.

So a new install of JMS 1.2 OK.
Installed patches but is says...

The patch definition 1.2.35 (or higher) also require to update the JMS kernel to a version 1.2.30 or higher

How do I get the new JMS kernel?
Surely I don't have to purchase it again.

Some patches installed. Will it still work without the kernel version 1.2.30?

Thanks
Bendo

Sorry forget this. Should have read the FAQ!!!

All good. Sorry to waste everyone's time.

Bendo
