The patch definition 1.2.35 (or higher) also requi Posted by Bendo - 2010/08/19 05:43
Hi Edwin,
I purchased JMS 1.2 a while ago and am rebuilding my sites.
So a new install of JMS 1.2 OK. Installed patches but is says
The patch definition 1.2.35 (or higher) also require to update the JMS kernel to a version 1.2.30 or higher
How do I get the new JMS kernel? Surely I don't have to purchase it again.
Some patches installed. Will it still work without the kernel version 1.2.30?
Thanks Bendo
Re: The patch definition 1.2.35 (or higher) also requi
Sorry forget this. Should have read the FAQ!!!
All good. Sorry to waste everyone's time.
