Unable to find install package

Posted by miasto - 2010/09/03 16:57

Hi there,

I have the above error while trying to install JMS.

I have checked available solutions with no result

increased time limit & file size in php.ini
chmod 777 directories
uploaded component thru FTP

Update. Remote URL install sorted out the problem.

This is probably due to an upload_max_size limit to small to upload a file of 3MB.
See the tutorial video 3 show how to install Jms multisites on Joomla 1.5 and 1.6.
It also provide an alternate solution to install from a directory.

http://tutorial.jms2win.com/joomla/multisite-12x/cpanel/install-from-directory

http://www.jms2win.com/en/tutorial#jms12x-3
