JMS Core Hack?

Posted by Patchworks - 2010/09/07 00:56

It is my understanding that JMS is a core hack? Is this true?

If so HOW do you advise upgrading Joomla?

YES JMS Multisites hack the core Joomla.
In does not replace the existing Joomla original files but proceed with modifcation inside the current sources. That mean that when Joomla proceed with bug fixes, you can re-apply the patches and benefit of the Joomla fixes.

For your information, we still have customer who are using JMS 1.0.x with latest Joomla 1.5.20 event the fact that JMS 1.0.x is no more update from almost 2 years.

The objective is to always keep the latest code of the original joomla (or extension) and to apply inside the latest code the modification to allow JMS Multisites do its stuff.
