## JMS, multisite for joomla - Joomla Multiple Sites and user sharing

Τ.

Generated: 14 November, 2025, 23:24 Getting site\_id while in Virtuemart Posted by themis94 - 2010/09/09 17:54 Hello, I'm using last JMS with VirtueMart 1.1.5 (and Joomla 1.5.20) I have 3 websites sharing the same database (master). The categories have an attribute defining one or more web sites to which they belong. How can I retrieve the "site id" in order to compare the attributes and assign if ok category X" to ShopA and/or shopB and/or shopC ? Thank you in advance. Τ. Re: Getting site id while in Virtuemart Posted by edwin2win - 2010/09/09 23:16 Different solutions. If this is in PHP, you can use the MULTISITES ID define value that contain the site id. If this is in a description, articles, you can also use the plugin Multisites ID that you can download at http://www.jms2win.com/free-download/doc download/16-multisites-id-plugin Re: Getting site id while in Virtuemart Posted by themis94 - 2010/09/10 12:08 Hello, MULTISITES ID is perfect for what I need Thank you, this was so easy finally:) bye
