Will support will help to setup exist sites

Posted by Patchworks - 2010/09/14 03:31

I've been evaluating JMS for a while now and I'm about ready to purchase a copy, but I just want to verify that support will be available to integrate my existing sites into JMS.

I'm pretty well educated on Joomla, MySQL, Hosting and web related matters. I'm hoping there will not be extra charges to get support.

I'm using HostGator with cPanel and I think somewhere I saw one of the tutorial videos using HostGator so I'm hoping this should be pretty intuitive to setup.

We do not provide evaluating JMS version and therefore we don't know how you evaluated our product.
The price of the product correspond to the fee for the download.
The free support is provided from this forum.
If you want specific support, this is possible with our billable support that can be ordered at http://www.jms2win.com/download?page=shop.product_details&flypage=flypage.tpl&product_id=35&category_id=1

Thanks for letting me know. I'll download a copy from the net then and save the money. I was only interested in buying the membership to get support.
