what about SEO

Posted by scioit - 2010/10/06 22:44

That, what about the Search Engine Optimization, how this component may or not affect the SEO, it's that independent for each website?

==========

It works like independent and standalone joomla wesbite.
So you can enable the SEF and get the URL friendly.

We have customers that are using our JMS Multisites for the Multi Level Marketing and optimize the website for specific keywords.

YES this is independent for each wesbite.
