Read More & Article Title links not sharing

Posted by feeroent - 2010/10/12 13:09

I'm using the Article Share extension to share slave site articles in the master site and the Title and Read More links within the master are not working. Note any of the articles on the home page of the links below to see the issue in action.

Slave site: http://www.pmacheshire.com/

Master site: http://www.ctpma.com/

What might be the problem?

None of the website return something (white pages).
The server seems to be down.
Unable to see what you did.

Can you try again, the servers are fine now.

I see that you have SEF enabled.

Try disable the SEF that you are using to verify the link.

I suspect that the SEF extension that you are using provide a wrong link.
Check the SEF setting and perhaps the custom SEF resolution depending on the extension you are using for the SEF.

Are you using the latest version of the article sharing ? (Version 1.0.12)

I have it enabled on the ctpma site, but not on the pmacheshire site. Was never able to get it to work on the pmacheshire site. I disabled it on the ctpma site, but no luck problem remains. SEF also remains disabled for now.

I do not have any custom SEF extension installed, just what comes with Joomla base. I have MultiSite V1.2.17 and Article V1.0.10 installed.

Is there a chance the install has an error? These two sites have been up and running since early 2009. I can enable a temporary Admin account for you to take a peek, as long as you keep the production site up and running. Thoughts?

Amoung the things that you can try is first update the JMS and the article sharing to use the latest version/
The FAQ to see how to get the latest version
http://www.jms2win.com/faq#sec-122

If you want that we have a look directly on your server and help you configure your environment, this is possible with our billable support that you can order at
http://www.jms2win.com/download?page=shop.product_details&flypage=flypage.tpl&product_id=35&category_id=1

Both JMS and Article Sharing are updated to lastest version, and the problem remains. Thoughts?
