This is a joomla standard code that is called on IIS platform and that try to get the information present in the URL.

Can you confirm that you are working on IIS or Windows platform.

Perhaps you should report the warning directly to Joomla.org to mention them that sometimes the QUERY_STRING is not defined.

This is a bug reported into Joomla Bug Tracker.
Here it is the link and the solution proposed by Joomla to fix the error message
http://joomlacode.org/gf/project/joomla/tracker/?action=TrackerItemEdit&tracker_item_id=22701
