SobiPro tables to be shared?

Posted by nicksarbacker - 2010/12/24 17:59

Will SobiPro tables be able to be shared with JMS Multisite? If so, when will this be implemented?

If you want that we have a review of Sobi Pro and see if this is possible to share this extension then please send us this extension in the attachement of an email.
You will find our email in the contact us

Hi Edwin,

The next release of SobiPro should be the stable for production sites. I've attached the Beta Version 3.3. Since SobiPro will be a free (non-commercial) extension I think it would be great if the database tables could be shared in Joomla 1.6. Could you let me know the possibility of sharing SobiPro data through JMS Multisite?

Thanks.
