Component's templates and plugins Posted by Imendoza - 2011/03/17 15:16
Hello, Hope you're fine.
I have a question, I'd like to know if i have 10 sites, and I'd like to install a new newsletter template or acymailing or other component.
Is it possible to do this from the master site at once?
Kind Regards, Luis Mendoza

The minimum is to do it in 2 times.
You always need to install on the master and after you have to re-install in a slave site. When you create a group of slave site, you can go in the JMS Tool menu and in this case, you can as to install and propagate to the chidreen. So that in one click, you can propagate the installation to several hundred of websites.
So all depends if you have created a group or kept the slave site beside of each other.
