Mulisites Content Sharing 1.6 compatibility

Posted by mismarketing - 2011/03/30 03:48

I know Multisites Content is not compatible with Joomla 1.6 yet and I know you have posted that it may not be a new version but a new product, but do you have an estimated time for availability of a 1.6 compatible version of Multisites Content or something with article sharing functionality for Joomla 1.6? Thank you.

For the moment, we are working on the "Article Sharing for JMS" for Joomla 1.6. It is not yet guarantee that it will be an upgraded version with Joomla 1.5 and 1.6 but we are trying to do it like that. We hope to release it in april or may.

After that we will work on the "Multisite Content Sharing" that will be probably another product for Joomla 1.6 as Joomla totally changed the modules. It should probably not available before mai or june or event july.
