Cannot able to log into Slave sites

Posted by sandeepan512 - 2011/05/11 21:33

_____

Hello,

I have created 2 slaves sites by following a video tutorial.

The problem is - when I go to the slave site administrator, it opens up the master site administrator. I just cannot log into slave site administration.

Please, I need to fix this issue and where's the special category for the paid users.

_____

You mentioned that you created slave site following video but you didn't give the video number to let us now what you did and with which values.

Did you created slave sites that share the users or independent (fresh) websites ?
Which joomla version do you use ? 1.5 or 1.6

Our billable support is available here
