Hello,

I have created 2 slaves sites by following a video tutorial.

The problem is - when I go to the slave site administrator, it opens up the master site administrator. I just cannot log into slave site administration.

Please, I need to fix this issue and where's the special category for the paid users.

## Re: Cannot able to log into Slave sites Posted by edwin2win - 2011/05/16 13:16

You mentioned that you created slave site following video but you didn't give the video number to let us

Did you created slave sites that share the users or independent (fresh) websites? Which joomla version do you use ? 1.5 or 1.6

Our billable support is available here

now what you did and with which values.
