Article Sharing COM_CONTENT issues remain

Posted by archangelweb - 2011/07/18 09:07

Joomla Multi Sites version: 1.2.58 (Latest available: 1.2.58)
Patches definition version: 1.2.63 (Latest available: 1.2.63)
Joomla 1.6.4
Article Sharing 1.1.1

Standard Joomla features and information such as Read More, Published date, etc are showing up, on the slave site, as

COM_CONTENT_CREATED_DATE_ON
COM_CONTENT_READ_MORE_TITLE
etc

Examples:
http://demo.teenwc.com/index.php/teen-world/twc-featured-stories
http://demo.teenwc.com/index.php/teen-world/twc-featured-stories/13-teen/21-teen-canada-world

My assumption is a language file is involved, but have no idea which one OR what syntax to use.

Can anyone help? Since my setup is very simple, I would think this would be addressed in the software already, so maybe I am missing something else?

Forgot to mention that /language/en-GB/en-GB.com_content.ini does include definitions for these items.

If these code does not exists in Joomla language code, perhaps this is something that they forget.

No, it IS in the language files I checked. This leads me to believe:
1. I am looking at the wrong language files, or

2. I am not seeing what I need to see, or
3. I am the ONLY person in the world who is having this problem.

Joomla 1.6.5
Joomla Multi Sites version: 1.2.58 (Latest available: 1.2.58)
Patches definition version: 1.2.63 (Latest available: 1.2.63)

Taken from /language/en-GB/en-GB.com_content.ini

COM_CONTENT_READ_MORE="Read more: "
COM_CONTENT_READ_MORE_TITLE="Read more..."

For good measure, taken from /language/en-GB/en-GB.com_multisitescontent.ini

COM_MULTISITESCONTENT_READ_MORE="Read more: "
COM_MULTISITESCONTENT_READ_MORE_TITLE="Read more..."

Again, I have a very simple implementation of Multi-sites and Article sharing, so it seems reasonable that it would work correctly. Maybe someone in the extension comments area of Joomla.org will help.

Sorry but as I am not able reproduce this behavior and therefore I can not tell you where the problem comes from and I am not able to fix it.

If you want that I investigate on your environment and try identifying what cause this problem, you can buy our billable support at
http://www.jms2win.com/en/joomla-multisite?page=shop.product_details&flypage=flypage_multisites.tpl&product_id=35&category_id=1
