Soporte en Español

Posted by Redes Asociadas - 2011/07/23 21:41

Porfavor consideren el soporte en español porque ya somos muchos hispanoparlantes utilizando joomla y jms2win Multisite.
Una ultima pregunta es verdad que jms2win Multisite funciona en Joomla 1.7 y lo hara en Joomla 1.8 ?

JMS contain spanish language file that is translated by customers in mexico.
Concerning compatibility with Joomla 1.7 and future 1.8, we continuing to update or upgrade JMS to have compatibility with the future version.

The current JMS 1.2.59 can be considered as a good release candidate for Joomla 1.7.
We still not yet have retested all the cases but seems to be OK.
